

CCS Inc. Opens New Subsidiary in Thailand to Strengthen Overseas Customer Support

Bangkok, Thailand, 11 January 2019 – CCS Inc. (CCS, Japan; President - Hiroyuki Onishi), the world's leading manufacturer of LED lighting in machine vision image processing, is pleased to announce that its representative office in Bangkok, Thailand, is now CCS MV, a subsidiary under CCS Asia (Singapore) as of 14 January 2019.

CCS opened a representative office in Thailand under its consolidated subsidiary CCS Asia in 2011, building and expanding its support base for customers on many projects, notably for automotive, electronics and semiconductor manufacturers in Thailand and Vietnam.

The new subsidiary aims to provide faster response to customers and more robust support capability. It will also allow for transactions in local currency and reduce the inconveniences of import procedures.

The CCS MV office space is over twice as large as before, with an expanded laboratory to suit local needs. In addition to many of our standard LED lighting products, the laboratory boasts a large selection of cameras and lenses used in the inspection from various manufacturers. Furthermore, it is equipped with line sensors and area sensors, and it is also possible to conduct testing according to the speed of the customer's production line.

By combining various equipment for image processing applications and over 20 years of industry knowledge, CCS can propose the optimal inspection environment for our customers.

CCS will continue to expand its facilities in Japan and overseas to establish itself as a vendor of essential solutions that helps manufacturing companies worldwide see what needs to be seen.
