

CCS Inc. Opens 16th Subsidiary to Strengthen Overseas Customer Support in Malaysia

Penang, Malaysia, 28 June 2019 – CCS Inc. (CCS, Japan; President - Hiroyuki Onishi), the world's leading manufacturer of LED lighting in machine vision image processing, is pleased to announce that its representative office in Malaysia is now CCS MV (Malaysia) Sdn.Bhd., a subsidiary under CCS Asia (Singapore) as of 1 July 2019.

CCS opened a representative office on the outskirts of Kuala Lumpur and on Penang Island under its consolidated subsidiary CCS Asia in 2016, providing solution proposals and support for customers, especially for projects in Malaysia's semiconductor and electronics manufacturing industries.

To provide faster response to customers and more robust support capability, CCS is converting from a representative office to a subsidiary, which will be based in Penang. It will allow for transactions in local currency and reduce the inconveniences of import procedures for customers. As part of CCS Asia's ongoing efforts, the Malaysia office will offer more solution proposals that include peripheral equipment, image processing, robots, etc., according to the customer's request.

The new Malaysia office has been relocated and expanded its testing laboratory to suit local needs. In addition to many of our standard LED lighting products and power supplies, the laboratory boasts a large selection of cameras and lenses used in inspection from various manufacturers. In addition to area scan application, it is also equipped with test facilities for line scan application, and it is also possible to conduct testing according to the speed of the customer's production line.

As a leading vendor of solutions critical to helping manufacturing companies worldwide successfully see what needs to be seen, CCS will continue to accelerate its expansion in Japan and overseas.

For more information, please do not hesitate to contact us or visit our website at www.ccs-grp.com.

About CCS

CCS Inc. is the global leader in LED lighting for machine vision applications, pioneering advances in Illumination and Photonics products and technologies. CCS offers a comprehensive range of machine vision lighting solutions: high-precision area and line scan illumination with special functions and intelligent lighting as well as plug & play lighting solutions.

Headquartered in Kyoto, Japan, CCS has over 25 years of experience in illumination and 15 locations worldwide. CCS manufactures the highest quality, largest selection of standard and custom products in the industry – providing the
