

FOR IMMEDIATE RELEASE

CCS-EFFILUX Hyperspectral LED Light awarded gold by 2020 Innovators Awards Program

Boston, MA, USA, 16 June 2020 – CCS, the world’s leading provider of LED lighting solutions for machine vision, was recognized among the best in the industry by the judges of the Vision Systems Design 2020 Innovators Awards program with a gold award for its VIS-NIR hyperspectral LED lighting series, the EFFI-FLEX-HSI, a joint effort between CCS Inc. (Kyoto, Japan) and subsidiary EFFILUX (Paris, France).

The proprietary wideband single LED solution has a continuous spectrum from 400 nm to 900 nm which is ideal for hyperspectral imaging applications. This light-source maximizes the benefits of LED technology for hyperspectral imaging without the limitations of using halogen or multiple narrow-band LED solutions and can be built into a wide range of illuminators by the CCS Group, including projectors, bar, ring, and back lights.

“The Vision Systems Design team would like to congratulate CCS and EFFILUX for being publicly recognized by the esteemed judging panel of the 2020 Innovators Awards program,” says John Lewis, Editor in Chief. “Each year this unbiased and increasingly competitive program aims to celebrate the most innovative products and systems in machine vision, and both teams should be very proud of their accomplishment.”

CCS and EFFILUX will continue to actively utilizing the technical capabilities of both companies to offer innovative solutions and help customers illuminate what needs to be visible.

About CCS

CCS Inc. is the global leader in LED lighting and power supply for machine vision applications, pioneering advances in Illumination and Photonics products and technologies. Headquartered in Kyoto, Japan, CCS offers a wide range of machine vision lighting solutions: high-precision area and line scan illumination with special functions and intelligent lighting as well as plug & play lighting solutions. With over 25 years of expertise, CCS manufactures the highest quality, largest selection of standard and custom products in the industry—realizing solutions that provide customers with the visibility they need for machine vision.

About EFFILUX

EFFILUX, a member of the CCS Group, with head office in Paris, specializes in the design, manufacturing and sales of powerful, flexible and easy-to-use LED lighting solutions for machine vision applications. EFFILUX differentiates itself through cutting-edge flexible LED lighting design, extensive optical experiences, in-depth technical knowledge, strong customization capabilities, and comprehensive lighting solutions with superior quality. For more information, please visit www.effilux.com.

About Vision Systems Design

Published since 1995, Vision Systems Design is a global resource for engineers, engineering managers and systems integrators that provides comprehensive global coverage of vision systems technologies, applications, and markets. Vision Systems Design's magazine, website (www.visionsystems.com), email newsletters and webcasts report on and analyze the latest technology and business developments and trends in the worldwide machine vision and image processing industry.

About The Vision Systems Design 2020 Innovators Awards program

The Vision Systems Design 2020 Innovators Awards program reviews and recognized the most innovative products and services in the vision and image processing industry. High-scoring companies were announced via webcast on June 16th. Criteria used in the Innovators Awards ranking included: originality, innovation; impact on designers, systems integrators and end-users; fulfilling a need in the market that hasn't been addressed, leveraging a novel technology, and increasing productivity.
