

FOR IMMEDIATE RELEASE

CCS Group Opens New Light Lab in Munich

Enhancing services for customers driving innovations in the DACH region

Kyoto, Japan, September 2, 2025 –CCS Inc. is pleased to announce that its group entities, CCS Europe^{*1} and EFFILUX^{*2} jointly opened a Light Lab while relocating its German office. This new function marks a strategic expansion of CCS Group's presence in DACH^{*3} while reinforcing its commitment to offering cutting-edge lighting technologies for machine vision applications.

In Europe, CCS group has been helping customers build the best inspection environments through its Light Lab at CCS Europe in Belgium and at EFFILUX headquartered in France-- a leader in high-power lighting design acquired by CCS in 2018. Today, the two teams collaborate to provide customers with an unparalleled environment for testing and optimizing lighting setups tailored to customers' needs.

The Light Lab is designed to help customers unlock the full potential of CCS group's lighting technologies. It features a wide array of CCS machine vision lights and controllers, complemented by cameras, lenses, and other equipment supplied by trusted partners. This setup enables precise and high-quality experimentation, ensuring customers receive the optimal inspection ideas and proposals-- based on their concerns and requests.

"The new office in Munich will strengthen our market position in the DACH region." said Dr. Klaus-Henning Noffz, CEO of CCS Europe, "We will be closer to our customers and partners. Its advantage is a faster and improved service. In our Light Lab, customers can run intense tests for the best lighting. Our engineers will help finding the right lighting solution – either standard or customized."

"Bringing our teams together in Munich allows us to deliver even greater value to our customers." said Jean-Philippe Blanchot, President of Effilux. "We're here to listen, innovate, and solve challenges—side by side with our customers."

About CCS Inc.

Since 1993, CCS has advanced the machine vision industry by developing LED lighting for inspection that creates customer satisfaction for both manufacturers and their consumers, who demanded safe, high-quality goods. Today, CCS leads the machine vision world in innovation with thousands of products including lights, controllers, and accessories. CCS's global network of employees is dedicated to helping manufacturers capture the most important details in an inspection so that their customers never receive anything less than their highest quality.

About EFFILUX SAS

EFFILUX, headquartered near Paris, France, specializes in the design, manufacturing, and sales of high-power lighting solutions for machine vision applications. These solutions allow users to optically adjust the lighting to suit their inspection environments. With a team of experts possessing extensive optical knowledge, EFFILUX has established a solid position in the European machine vision lighting market through flexible design capabilities, customized support, and high product quality.
