

FOR IMMEDIATE RELEASE

CCS brings “CCS OpenWorld in Yokohama 2025” to life

Going beyond customer satisfaction — toward delivering an experience inspiring customers

Kyoto, Japan, September 9, 2025 – CCS Inc. (CCS) will host a private trade show, “CCS OpenWorld in Yokohama 2025,” from December 3rd (Wed) to 5th (Fri), 2025, at Nisseki Yokohama Hall in Yokohama, Kanagawa Prefecture, Japan.

Since 2022, CCS has been hosting the “CCS Machine Vision Solution EXPO”, a pre-registration-required private trade show that allows customers to not only see but also experience the latest machine vision solutions with broad applications.

At the December 2024 show, CCS showcased more than 40 solutions and featured multiple conferences on machine vision and its related technologies. Over the three-day period, CCS welcomed more than 1,200 customers from 13 countries and regions.

As the scale of this private event continues to grow year after year, CCS has decided to rename it to “CCS OpenWorld” starting December 2025. The new name reflects CCS's commitment to derive an open strategy where CCS collaborates broadly and flexibly with diverse partners to propose innovative ideas that help resolve customers’ problems.

At “CCS OpenWorld in Yokohama 2025,” CCS will showcase lighting products and controllers, as well as solutions developed in collaboration with various partners. Through these showcases, CCS aims to propose ideas and solutions that best address customer problems, exceed customer satisfaction, and deliver an experience that inspires customers.

■ **CCS OpenWorld Logo Unveiled**

The CCS OpenWorld logo is inspired by the key components of machine vision—cameras, lenses, and lighting. It symbolizes the initials of “CCS OpenWorld” and represents open connections, reflecting its commitment to collaboration and openness.

About CCS

CCS was established in 1993 with the philosophy of “Advancing Society with the Science of Light.” Since then, it has advanced the machine vision industry by developing LED lighting for inspection, creating customer satisfaction for both manufacturers and their customers, who demand safe and high-quality goods. Today, CCS leads the machine vision world with thousands of innovative products including lights, controllers, and accessories. In the course of its rapid growth, CCS has insisted and focused on evolving from a mere lighting company into a lighting solution vendor to resolve customers' problems.
