

FOR IMMEDIATE RELEASE

**CCS Hosts “CCS OpenWorld in Yokohama 2026”
a Private Trade Show of Inspection Solutions
Beyond customer satisfaction through open collaboration**

Kyoto, Japan, September 28, 2026 – CCS Inc. (CCS) will host a private trade show, “CCS OpenWorld in Yokohama 2026,” from December 2nd (Wed) to 4th (Fri), 2026, at Shintoshin Hall in Yokohama, Kanagawa Prefecture, Japan.

At last year’s event, CCS showcased more than 40 image processing solutions and featured multiple conferences on machine vision and its related technologies, with featuring 11 partner companies participating as exhibitors. Over the three-day period, CCS welcomed more than 1,200 visitors*¹ from both Japan and abroad.

“CCS OpenWorld in Yokohama 2026” is a private trade show that provides customers with an opportunity to explore comprehensive solutions to “challenges in inspection and measurement processes,” all in one place. In addition to showcasing solutions developed in collaboration with Japanese and international companies, 13 partners will participate as sponsors and exhibitors at the event. Through broad collaboration with a diverse range of partners, CCS goes beyond inspection lighting solutions to propose cutting-edge ideas that combine cameras, lenses, image processing software, and AI technologies with CCS’s proprietary tuning expertise.

In addition, “CCS OpenWorld in Yokohama 2026” is expected to attract not only Japanese customers but also international customers—including Asia, the Americas, and Europe. CCS aims to propose optimal solutions and ideas that best address “challenges in inspection and measurement processes” faced by manufacturing customers worldwide, exceed customer satisfaction, and deliver experiences that inspire customers.

*¹ Number of visitors at “CCS OpenWorld in Yokohama 2025”: Approximately 1,100 from Japan and approximately 100 from abroad

About CCS OpenWorld

Since 2022, CCS has hosted private trade shows in Japan that allow customers to not only see but also experience the latest machine vision solutions.

In recent years, partner companies specializing in cameras, lenses, peripherals, and equipment have also been showcasing at these events.

In addition to each company's new products, CCS showcases solutions created by combining CCS products with those of CCS partners, designed to simulate actual inspection processes. The name "CCS OpenWorld" embodies the common concept of CCS private tradeshows: derive an open strategy where CCS collaborates broadly and flexibly with diverse partners to propose innovative ideas that help resolve customers' challenges.

About CCS Inc.

Since its establishment in Kyoto in 1993 as a manufacturer of LED lighting for inspection, CCS has grown into a leading company in inspection LED lighting. CCS has developed innovative lighting and provided solutions to customers across a wide range of industries based on its "Lighting Solution" expertise, which improves inspection accuracy through innovative ways of applying light in inspection processes.. In recent years, CCS has been actively collaborating with various camera manufacturers, lens manufacturers, and software vendors to provide a broader range of solutions that address the new challenges and requirements customers face in their inspection processes.
